-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3634

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The drawing correction dated 1/18/2005 has been approved by the Examiner.

The following Information disclosure statements have been considered and a copy has been placed in the file (some references which have been "crossed-through" were repeated):

1/18/2005

11/21/2005

3/1/2006

2/15/2007

3/22/2007

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Clark et al. (6,904,717). Clark et al. (6,904,717) discloses a driving apparatus comprising a

plurality of driving sources (32 and 330), a plurality of driving gears in the form of worm gears (356, 358, 362) and worm wheel (364, and/or any one of the worm gears), a striker (322), and an assisting mechanism (344 and/or 366). Clark et al. (6,904,717) still further discloses sensors connected to the drive sources which sense when the latch has moved to a full latched position (see figure 22 and column 22, lines 53-67 and throughout the patent which discloses basic operational parameters).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent to Hamada et al. discloses two motors, which drive a closure, and latches the closure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-F from 8 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Glessner, can be reached on 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
